

# Troy Wiltbank 's Swallowtail

Here are some pics of my 75. This was formally TURBOCADDY's car.

**Troy Wiltbank**  
**Tacoma, WA. USA**  
**vwtvortex: twwitdavw**  
1975 Rabbit  
VIN: **1753350123**

Color: L 20 A (Chrome Yellow)

I don't have much history on this car, but the last person who owned it purchased it at auction for \$35!! And it was perfectly straight with a none running single carburetor 1.6 liter. The owner (Jake McGuire) made several modes most listed below. After the car was involved in a freak shopping cart accident, and a float brook on the uber rare 40mm sidedraft Solex's Jake was disappointed and sold the car to me. Here are some of the mods on the car.

All US spec parking lights and antenna are shaved.

H & R sport springs  
Bilstein shocks  
10.1 front brakes  
Steel braided brake lines  
1.8 liter (currently in the car)  
Solex 40mm ADDHE side draft Carbs  
Dellorto 40mm DHLA side draft Carbs  
Bellevue Motorsports header  
2.5" exhaust (no cat)  
Knock sensor installed  
H4's of course  
Battery relocated to the rear.

I am piecing together a 2.0 ABA bottom end and 1.8 solid lifter head high compression motor... Yummy!
